

Environmental Product Declaration

In accordance with ISO 14025:2006 and EN 15804:2012+A2:2019/AC:2021 for:

**PITTSBURGH
PAINTS CO.**

Pittsburgh Paints Company PPG Advantage 900 Interior/Exterior Acrylic Paint

Programme:	The International EPD® System, www.environdec.com
Programme operator:	EPD International AB
EPD registration number:	EPD-IES-0013190
Version date:	2025-09-11
Validity date:	2030-09-11

An EPD may be updated or depublished if conditions change. To find the latest version of the EPD and to confirm its validity, see www.environdec.com.

EPD of multiple products, based on worst-case results.

EPD of construction products may not be comparable if they do not comply with EN 15804.

General information

Programme information

Programme:	The International EPD® System
Address:	EPD International AB Box 210 60 SE-100 31 Stockholm Sweden
Website:	www.environdec.com
E-mail:	support@environdec.com

Accountabilities for PCR, LCA and independent, third-party verification
Product Category Rules (PCR)
CEN standard EN 15804 serves as the Core Product Category Rules (PCR)
Product Category Rules (PCR): <i>International EPD System, PCR for Construction Products, 2019:14, version 2.0.1.</i>

PCR review was conducted by: The Technical Committee of the International EPD System. See www.environdec.com for a list of members. Review chairs: Rob Rouwette (chair), Noa Meron (co-chair)
The review panel may be contacted via support@environdec.com.

Life Cycle Assessment (LCA)
LCA accountability: Zixuan Zhang, Product Sustainability Specialist, Product Sustainability CoE
Third-party verification
Independent third-party verification of the declaration and data, according to ISO 14025:2006, via: ☒ EPD verification by EPD Process Certification* without a pre-verified LCA/EPD tool
Internal auditor: Yiping Qu, Product Sustainability Specialist, Product Sustainability CoE
Third-party verifier, accountable for the certification: Epsten Group, Inc. 101 Marietta St. NW, Suite 2600, Atlanta, Georgia 30303, USA www.epstengroup.com
Third-party verifier is accredited by A2LA
Procedure for follow-up of data during EPD validity involves third party verifier: ☐ Yes ☒ No

EPD Type: Worst case. This EPD is based on the worst case life cycle impacts (of each reported life cycle impact category) of all variations of Pittsburgh Paints Company PPG Advantage 900 Interior/Exterior Acrylic Paint.

*EPD process certification involves an accredited certification body certifying and periodically auditing the EPD process and conducting external and independent verification of EPDs that are regularly published. More information can be found The EPD owner has the sole ownership, liability, and responsibility for the EPD. This EPD is intended for B2B communication

EPDs within the same product category but registered in different EPD programmes, or not compliant with EN 15804, may not be comparable. For two EPDs to be comparable, they shall be based on the same PCR (including the same first-digit version number) or be based on fully aligned PCRs or versions of PCRs; cover products with identical functions, technical performances and use (e.g. identical declared/functional units); have identical scope in terms of included life-cycle stages (unless the excluded life-cycle stage is demonstrated to be insignificant); apply identical impact assessment methods (including the same version of characterisation factors); and be valid at the time of comparison. For further information about comparability, see EN 15804 and ISO 14025.

Information about EPD owner

Owner of the EPD: Pittsburgh Paints Company, 400 Bertha Lamme Drive
Cranberry Township, PA 16066

Contact: pittsburghpaintsco.com

Description of the organisation: PPC is a manufacturer of many coating brands throughout North America.

Product-related or management system-related certifications:

PPC has been a separate company from PPG since 2024-12-02; PPG's EHS Policy incorporates the elements of voluntary global industry initiatives, including Responsible Care® and Coatings Care®, which help companies manage safe and environmentally responsible practices in the chemicals and coatings industries. At more than 40 of its facilities, PPG has received ISO 14001:2004 certification.

Name and location of production site(s):

Oakwood, United States

Product Information

Product name: Pittsburgh Paints Company PPG Advantage 900 Interior/Exterior Acrylic Paint

Product identification: Products are identified by name

Product description: Advantage 900 is a top quality, waterborne, very fast dry, acrylic enamel developed to have many characteristics of an alkyd enamel, but with water clean-up. It is designed for application, with minimal preparation, to interior and exterior trim, doors, and other architectural, institutional and residential surfaces.

**Any technical information of the product should refer to the TDS.

UN CPC code: 35110

Geographical scope: Global

Lifespan: 5 years

Coverage rate: 9.8 m²/L

LCA Information

Declared unit: The declared unit for this EPD is 1 kg. The spreading rate is averaged at 9.8 m²/L.

Time representativeness: 2023

Database(s) and LCA software used: Ecoinvent 3.10, Industry Data 2.0; Simapro v. 9.6.0.1.

Electricity usage in A3: Consumption mix of United States of America - GEORGIA, renewables removed; Climate impact: 0.746 kg CO₂eq/kWh (GWP-GHG)

Cut-off rules: Neglected flows in all modules are less than 1% of mass and energy. Neglect flows per life-cycle stages A1-A3, A4-A5 and C1-C4, aggregated are less than 5% of mass and energy. Cut-off rules do not apply to Module A1, which is 100% modelled.

Allocation method: Mass allocation: A3 energy/material inputs and waste outputs are allocated by total products manufactured over 1 year

Description of system boundaries:

The type of EPD is Cradle to Gate with Options (EPD Type b - Modules A1-A3, A4, A5, C1-C4, and D). B modules are excluded since no use phase maintenance, repair or replacement is expected during the technical life time.

System diagram:

Please refer the table below for A1-C4 life cycle stages.

Modules declared, geographical scope and data variation (in GWP-GHG results):

Module	Product stage			Distribution/installation stage		Use stage	End of life stage				Beyond product life cycle
	Raw material supply	Transport	Manufacturing	Transport	Construction installation		De-construction demolition	Transport	Waste processing	Disposal	
Module	A1	A2	A3	A4	A5	B1-B7	C1	C2	C3	C4	D
Modules declared	X	X	X	X	X	ND	X	X	X	X	X
Geography	GLO	GLO	US	GLO	GLO		GLO	GLO	GLO	GLO	GLO
Variation – products	-35% Note 1										
Variation – sites	N/A										

Note 1: Since EPD uses the maximum value of all products, this is based on the ratio of the GWP-GHG of the minimum product to the EPD reported value for Stages A1-A3, i.e., the variation is entirely below the reported result.

Declaration of data sources, reference years, data categories, and share of primary data:

Process	Source type	Source	Reference year	Data category	Share of primary data, of GWP-GHG results for A1-A3
Binder	Database	Industry data 2.0	2023	Secondary data	0%
Pigment	Database	Ecoinvent 3.10	2024	Secondary data	0%
Other Processes	Collected data, database, supplier data	EPD owner, Ecoinvent 3.10, packaging supplier	<5 years old	Primary data	18%
Total share of primary data, of GWP-GHG results for A1-A3					18%

The share of primary data is calculated based on GWP-GHG results. It is a simplified indicator for data quality that supports the use of more primary data, to increase the representativeness of and comparability between EPDs. Note that the indicator does not capture all relevant aspects of data quality and is not comparable across product categories.

Manufacturing processes in module A3 are always less than 2 years old.

Summary of product and data quality assessment:

Advantage 900 is a top quality, waterborne, very fast dry, acrylic enamel developed to have many characteristics of an alkyd enamel, but with water clean-up. It is designed for application, with minimal preparation, to interior and exterior trim, doors, and other architectural, institutional and residential surfaces.

Its life span is 5 years with a A1-A3 GWP total of 2.9 kg CO₂e/kg.

Primary data, such as water and electricity consumption and production waste, are based on measurements at the relevant manufacturing plant from 2023-01-01 to 2023-12-31. Except for A3 manufacturing processes, all upstream and downstream processes are based on secondary data from Ecoinvent 3.10 or Industry Data 2.0, or supplier data (for raw materials only)

According to Annex E, Table E.1 of EN 15804, the data quality levels of the datasets are classified as very good, good, or fair.

Content Declaration

Product components	Weight, kg	Average Weight, kg	Post-consumer material, weight-% of product	Biogenic material, weight-% of product	Biogenic material, kg C/declared unit
Binders	2.7E-01~3.3E-01	3.0E-01	-	-	-
Solvents	1.6E-02~1.7E-02	1.6E-02	-	-	-
Pigments	1.7E-03~2.2E-01	1.1E-01	-	-	-
Water	4.9E-01~6.5E-01	5.7E-01	-	-	-
Others	<0.001	<0.001	-	-	-
Total	1.0E+00	1.0E+00	0	0	0

Packaging materials (Note 1)	Weight, kg	Weight-% (versus the product)	Weight biogenic carbon, kg C/declared unit	PCR material, Weight-% in packaging material
Steel for cans/buckets	3.3E-02	3.2%	0.0E+00	-
Polypropylene for cans/buckets	8.8E-02	8.7%	0.0E+00	-
HDPE for cans/buckets	6.0E-02	6%	0.0E+00	-
TOTAL	1.8E-01	18%	0.0E+00	-

Note 1: Packaging weights are the maximum of the individual products included in the EPD. Packaging weight percentages are assessed on the maximum product weight per declared unit given above.

Dangerous substances from the candidate list of SVHC for Authorisation	EC No.	CAS No.	Weight-% per declared unit
None			

Biogenic carbon content	Product's biogenic carbon content at the factory gate kg C
Biogenic carbon content in product (Note2)	0.0E+00
Biogenic carbon content in accompanying packaging (Note 3)	0.0E+00

Note 2, Note 3: Biogenic carbon in the product and in the packaging is the minimum of the individual products and packagings included in the EPD

Manufacturing Process

The manufacturing process for coatings primarily involves the mixing and dispersing of raw materials into a homogeneous mixture. Raw materials include pigments and fillers, which provide colour, hiding, and gloss control; resins/binders, which dry to form a solid film and adhere the coating to the substrate and additives, which assist with various coating properties. The product is then shipped to the customers as a set for them to mix at the job site before application.

Assumptions beyond module A3

A4

Transportation distance is assumed to be 850 km according to US geography and location of Pittsburgh Paints Company factories. Transportation mode is assumed to be by Euro 5 16-32 metric ton truck.

A5

The following sub modules and assumptions are included in A5

1. Application tools and ancillaries: roller and its packaging.
2. Disposal of application waste: environmental impact from manufacturing and content of estimated 1% application loss is included. Environmental impact of manufacturing, content and disposal of 1% product leftover is also included. Content of leftovers are assumed to be disposed of as nonhazardous waste to landfill.
3. Primary packaging (steel and/or plastic) are disposed as nonhazardous waste to landfill, application loss is considered.

C1-C4

1. C1: Energy associated with demolition of the substrate structure is prorated for the mass of paint.
2. C2: Transportation to disposal is assumed to 80 km and transportation mode is assumed to be by Euro 5 16-32 metric ton truck.
3. C3: No waste processing options are considered.
4. C4: It is assumed that the paint will be disposed of along with the substrate in a landfill.

D

No benefits and loads beyond the product system boundary were declared since no reuse or recovery occurs for architectural coatings in general. In addition, since landfilling is assumed to be the waste disposal option in C4 module, no "useful energy carrier" is considered leaving the product system. Therefore, no benefit is claimed in module D.

List of excluded processes

1. A3: Raw materials and processing for the packaging (e.g. cardboard) of the paint containers (e.g., steel and plastic), and secondary packaging of paint finished products (e.g., plastic wraps for easy of transportation) are excluded from the system.
2. Personnel related processes, such as transportation of employees to and from work, are excluded.
3. The production and end-of-life processes of infrastructure or capital goods of Pittsburgh Paints Company plants are excluded.

Environmental performance

Potential environmental impact – mandatory indicators according to EN 15804 based on EF3.1

Results per declared unit (1 kg of coating)

Indicator	Unit	A1-A3	A4	A5	B1 - B7	C1	C2	C3	C4	D

* Disclaimer: The results of this environmental impact indicator shall be used with care as the uncertainties of these results are high or as there is limited experience with the indicator.

Statement: The estimated impact results are only relative statements, which do not indicate the endpoints of the impact categories, exceeding threshold values, safety margins and/or risks. The results of the end-of-life stage (modules C1-C4) should be considered when using the results of the product stage (modules A1-A3).

Potential environmental impact – additional mandatory and voluntary indicators

Additional voluntary indicators e.g. the voluntary indicators from EN 15804 or the global indicators according to ISO 21930:2017

Note 1: GWP-GHG is calculated as GWP - total minus any climate change impact (positive or negative) caused by biogenic carbon emission or uptake.

Note 2: This impact category deals mainly with the eventual impact of low dose ionizing radiation on human health of the nuclear fuel cycle. It does not consider effects due to possible nuclear accidents, occupational exposure nor due to radioactive waste disposal in underground facilities. Potential ionizing radiation from the soil, from radon and from some construction materials is also not measured by this indicator.

LCIA results includes infrastructure processes embedded in the generic LCI datasets used in modeling the entire life cycle of our products (A1-C4), which may include manufacturing, transportation and energy infrastructure plants outside Pittsburgh Paints Company's direct control. Infrastructure processes of Pittsburgh Paints Company manufacturing plants are excluded.
