

Aexcel[®]

*America's Toughest[™]
Traffic Paints*

- == High performance, waterborne and solvent-base formulations
- == Fast drying or conventional drying types
- == Traditional solvent-base and low VOC formulations
- == Available in standard zone marking colors

PAINTS

- Solvent-borne acrylic zone marking paints that dry quickly & provide excellent durability
- Optimum, long-lasting safety
- Performs well on all types of pavement

Waterborne Traffic Safety Paint

- Different formulations meet several US Federal TTP 1952 specifications:
 - Type 1: Regular Dry
 - Type 2: Fast Dry
 - Type 3: High Build
- Applicable over asphalt, airport runways, and new concrete in 30 days
- Excellent color retention
- Meets VOC requirements

Low VOC Acrylic Copolymer

- Dries quickly & provides superior durability
- Low VOC (under 100 g/l) acrylic copolymer traffic paint meets EPA regulations

- Bio-renewable binder...based on natural soybean oil
- <100 g/l, alkyd performance
- Excellent durability, color retention, and dirt repellency
 - Performs well on all types of pavement

- High-Performance, low VOC (under 100 g/l) solvent-borne acrylic
- Specifically designed for high traffic areas like arrows and stop bars
- Dries quickly, stays cleaner and offers better durability than standard traffic paints
- Performs well on all types of surfaces

- Soy-based asphalt sealcoat
- Stays black longer than conventional sealcoats
- Perfect for:
 - Driveways
 - Parking Lots
 - Multi-Purpose Trails

- Durable plural-component marking system
- Perfect for:
 - Bike Paths
 - Crosswalks
 - Stop Bars
 - Intersections
 - High Traffic Areas

Alkyd and Chlorinated Rubber

- Exceptional color retention to fight sun – won't "bleach out"
- High performance on a variety of surfaces
- Quick dry times
