

PPG Paint Maintenance Solutions Program

Healthcare Facilities

Healthcare facilities present unique maintenance challenges due to the broad range of demands placed on their physical space. From operating rooms and corridors to offices and patient rooms, paint-performance maintenance needs vary greatly. Such diverse needs call for flexible facility management that provides superior paint maintenance while keeping the interest of the patient as the top priority.

PPG professionals, through the PPG Paint Maintenance Solutions Program, can guide you in your paint selection process, helping you meet your maintenance challenges while minimizing healthcare facility disruptions. And more importantly, PPG provides maximum value through consultation. Not only do we answer all of your questions, we know what questions to ask to ensure the right coating is selected. The result: you achieve your maintenance goals on time and on budget.

The Voice of Color®, our industry-leading color program, offers more than 2,000 colors as well as complete color-matching capabilities.

Consistent Color Support and Management

Color Selection

PPG understands that color choice and color consistency are absolutely critical components in your overall maintenance program. We are uniquely suited to provide expertise and guidance in color matching, selection and delivery.

Color Consistency

All PPG products tint from the same color system and formula database, ensuring uniformity regardless of what PPG location your paint comes from.

Painting Green with PPG

If your goal is to “go green,” PPG can help. Whether you need to meet local or national VOC regulations, qualify for LEED points, or simply want to minimize the overall environmental footprint of your healthcare facility, PPG can supply a green product solution for every type of project.

We offer products that meet the most stringent environmental standards, which require either zero- or low-VOC coatings, while continuing to deliver the performance you expect.

The “**ecological Solutions from PPG™**” logo signifies PPG paints that are considered green and can help earn **LEED** credits based on current guidelines.

Go to www.ppgac.com/green for all the information you need to make your next project green.

For federal facilities, PPG Architectural Coatings is a GSA schedule holder for Hardware Super Store, FSC Group 51V. Schedule number GS-21F-0062U.

World-Class Product Line

PPG offers a broad and deep product line that is second to none in the industry. For every application in a healthcare facility and at every price point, there is a PPG coating that's right for the job. Each of our products is engineered – and guaranteed – to deliver optimum performance and efficiency.

The following is a sampling of PPG products uniquely suited for healthcare facilities:

PPG Pure Performance® Interior Latex

The zero-VOC content of PPG Pure Performance eliminates the detrimental impact on air quality and enables a space to be painted without damage to the occupant, all while delivering the performance you need. This low-odor paint allows you to paint a patient's room today and occupy the same room by tonight. PPG Pure Performance is ideal for healthcare paint settings because routine maintenance can be conducted without closing the section of the facility. Plus, its anti-microbial properties resist mold and mildew on the paint film.

PPG Speedhide®

Recognized by facility managers and building professionals nationwide, this widely specified, extensive line of products meets the most demanding commercial maintenance needs. Durability, ease of application, a wide range of products, economical pricing and low-VOC formulas make PPG Speedhide the product of choice for maintenance painters.

PPG Pitt-Glaze® WB1 Epoxy

The washable, stain- and abrasion-resistant finish of PPG Pitt-Glaze WB1 Epoxy stands up to frequent scrubbing, making it the ideal coating for high-traffic areas in a healthcare facility. Because there is no mixing or measuring, this single-component, pre-catalyzed water-borne acrylic epoxy provides convenience and efficiency. There is no limited pot life and application and clean-up are fast and easy. With its low-VOC content and mild odor, PPG Pitt-Glaze WB1 Epoxy provides what you need to avoid facility disruptions.

PPG Anti-Slip Safety Coatings

Slips and falls are a leading cause of injury at work, in public and at home. Our OSHA- and ADA-compliant anti-slip product line can help improve traction in most areas of your healthcare facility. The available products have the application range from light pedestrian traffic to heavy rolling equipment. These products are designed for indoor and outdoor use, and both water- and solvent-based technologies are available depending on your need for chemical resistance. In addition, the rapid dry times allow for minimal downtime and fast return to service.
