

METAL COATINGS

BRP ACRYLICS

Low-VOC, Durable Water-Borne Acrylic Coating

PPG BRP Acrylic Coatings are 100% acrylic, water-borne coatings formulated and developed specifically for use on properly prepared interior and exterior metal substrates. This direct-to-metal formulation achieves excellent weatherability and adhesion at VOC levels less than 100g/L, making it ideal for environmentally sensitive projects. This single-component acrylic coating system has excellent corrosion resistance and gloss and color retention. BRP Acrylic Coatings are an economical choice for a low-VOC, durable water-borne coating to restore existing metal finishes and extend the useful life of a building or structure.

WHY BRP ACRYLIC COATINGS?

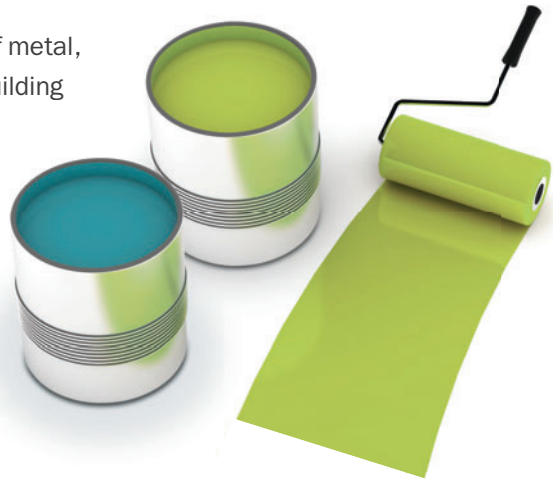

- Single-component, water-borne formula
- Less than 100g/L VOC
- Excellent color and gloss retention
- Excellent corrosion resistance
- Flash rust resistant
- No mixing or measuring
- No pot life
- Soap and water cleanup
- Available in satin and gloss finishes
- Can help earn LEED 3.0 credits

EASY APPLICATION AND SINGLE-COMPONENT CONVENIENCE

PPG's BRP Acrylic Coatings, a cost-effective way to extend the life of metal, are the ideal choice when it comes to acrylic coating systems for building restoration. These single-component, water-borne acrylics are convenient, supplied ready to use, and do not require mixing two components or measuring prior to use. Unlike two-component systems, a pot life does not apply to BRP Acrylic Coatings.

BRP Acrylics can be applied by brush, roll or spray, and fast dry times enable quicker return to service. Plus, cleanup with soap and water is swift and easy. With fast dry time and easy cleanup, BRP Acrylic Coatings will save you labor costs and time on the job.

COLOR SELECTION AND SUPPORT

PPG understands that color choice and color consistency are absolutely critical components to your overall building design. BRP Acrylic Coatings, available in both a satin and gloss sheen, come in a wide selection of colors that can be custom matched to meet your specific color and durability requirements. In addition to outstanding color availability, PPG is uniquely suited to provide expertise and guidance in both color selection and delivery. And we can also provide professional rendering services for your building renewal project.

EXPERIENCED, DEDICATED PROFESSIONALS AND OUTSTANDING SUPPORT

With over 40 years experience in the specialty coatings field, PPG can provide specialized technical support to assure a successful job. In addition to supporting architects and engineers in writing the best specifications, PPG's technical specialists work hand in hand with trained contractors. Your project will receive prompt, effective field service from our experts, who are available to answer questions, assist painting contractors, and ensure that your project goes smoothly.
