

# PPG PAINT MAINTENANCE — SOLUTIONS PROGRAM —

## Paint Solutions for **HOSPITALITY FACILITIES**

### PPG Architectural Coatings **One Brand. Infinite Solutions for Hospitality**

Providing guests the very best accommodations and service are key for managers in hospitality and recreation. From the first look at the hotel lobby to the time spent in their individual hotel suites, guests form early impressions of a hospitality facility. Maintenance matters. Guests may not notice when the paint is fresh, but they'll notice when it's not.

If you would like advice or a tailored approach for your paint maintenance program, our dedicated maintenance team is here to help. A paint maintenance specialist can guide you in your paint selection process to meet your maintenance challenges and can also provide an initial on-site consultation. Once you partner with us for all of your paint maintenance needs, we can provide you with a Facility Paint Maintenance and Operating Binder documenting both product and color recommendations throughout your entire hospitality facility.

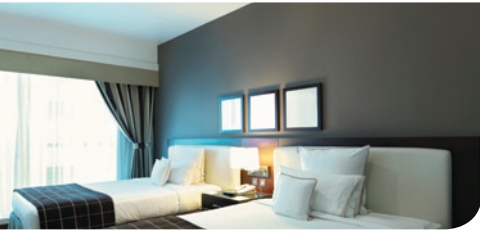

## Key Considerations for **PRODUCT SELECTION**

Selecting the right paint products for hospitality facilities is essential. Several key considerations need to be taken into account when selecting the appropriate paint products:

-  Areas where fast turnaround times are needed to ensure minimum disruption like hotel rooms, lobbies and restaurants
-  Areas where zero- or low-VOC and low-odor products are required like hotel rooms, lobbies and restaurants
-  Areas where slip and fall protection is of paramount importance like hallways, stairwells, pool decks and generally any public access space
-  Exterior areas subject to the harsh effects of the weather like facades, entryways and stairways

# Recommended Paint Solutions for Hospitality Facilities

## PPG SPEEDHIDE® Family of Products

PPG *Speedhide* family of products is a comprehensive line of zero- and low-VOC\* interior and exterior paints available at a variety of price points to meet the high production and low-odor requirements of maintenance professionals. *Speedhide* paints provide outstanding durability, ease of application, and good hide and coverage. A variety of *Speedhide* products meet either LEED® VOC standards and/or complies with MPI®, GREENGUARD®, and the Collaborative for High Performance Schools Standard.

\*Colorants added to this base paint may increase VOC level significantly depending on color choice.

## PPG BREAK-THROUGH!®

PPG *Break-Through!* is an innovative waterborne acrylic especially formulated to dry in 15 to 20 minutes. The outstanding early block resistance and quick dry time ensures increased productivity and faster turnaround making *Break-Through!* ideal for doors, doorframes, windows, and other items that need to be closed in a short period of time.

## PPG Anti-Slip Safety Coating

The hospitality industry's number one cause of loss is slip and fall. More than 40% of all hospitality claims result from some type of slip, trip or fall. Our OSHA and ADA compliant anti-slip product line can help improve traction in most areas of your facility. These coatings are available in a variety of grades from light pedestrian traffic to heavy rolling equipment to meet your facility's interior and exterior needs. In addition, the rapid dry times, allow for minimal downtime and fast return to service.

## PPG PERMA-CRETE® Masonry Coatings

PPG *Perma-Crete* Masonry Coatings provide a complete line of extremely durable and visually appealing protective coatings for a variety of interior and exterior concrete. PPG *Perma-Crete* products meet the demands of an array of surface conditions to solve job site issues and prevent future problems. The *Perma-Crete* Masonry Coatings advanced technology provides your property with premium concrete protection, enhancing the value of your property and adding years to the property's lifetime.

## PSX® One

*PSX One* is a low-VOC, one component acrylic-siloxane coating providing outstanding abrasion protection with exceptional color and gloss stability. This high performance coating has unlimited recoatability with itself, making touch-up and maintenance of your hospitality facility easier by eliminating sanding prior to repainting. *PSX One* coating also offers excellent corrosion resistance with unique surface tension characteristics to minimize rust or dirt-streaking. The exterior durability provides you the opportunity to help reduce future needs to apply maintenance paint for aesthetics purposes – a common practice when other types of topcoats are applied.

Note: Visit [ppgpro.com](http://ppgpro.com) for product technical data sheets for specific details on LEED, MPI, GREENGUARD and CHPS.

## Color Expertise

Hotels are now the runway for interior designers as they take comfort and design to new levels for travel-savvy customers. Color is a key part of the design mix that can create connections and memories to a space. At PPG, we consider color at every angle: aesthetics, trends, digital, matching and performance. A comprehensive suite of color tools and services offer the opportunity for you to engage with color the way we see it and specify it:

- Professional Color Renderings
- Annual Global Trends Forecasts
- Brand Scheme Support
- Custom Color Cards
- Color Standardization and Consistency
- National Sales and Color Support Team
